1

BEFORE PRINTING

1. Choose **DTF print queue** in your RIP software. Select the **DTF transfer print mode**, according to the t-shirt color and your image will be automatically mirrored.
2. Place the **DTF Xpress Antislip Pad** on the platen. Place on top, the **DTF Xpress Transfer Film** with the matte side facing upwards. Alternatively, you can use masking tape to secure the film.

2

PRINTING

Print your design on **DTF Xpress Transfer Film**. CMYK colors will be printed first, a white top layer will follow.

4

TRANSFERING PRINT ON GARMENT

1. Transfer the design onto a garment with a heat press.
2. **Remove** the film from the garment, once it has **cooled down**.

3

APPLYING & ACTIVATING ADHESIVE POWDER

1. Apply the DTF Xpress Adhesive Powder on the printed film.
2. **Shake off** the excess powder.
3. "Bake" the film to melt the DTF Xpress Adhesive Powder, using a heat press or oven. When using a heat press **hover over the film**.
