ICOLOR 540

White Toner Printer

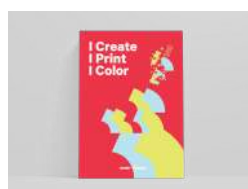

Ultimate Versatility & Heavyweight Performance

The NEW A4 IColor 540 is a Toner-Based Digital Transfer Printer from Uninet, featuring full colour combined with white overprint™ and underprint™ capabilities in a single pass.

The A4 IColor 540 is a unique, low cost and versatile on-demand printing solution for short to mid-run transfer production of garments, labels, stationary, banners, hard surfaces, marketing customisation and much more! The IColor 540 is like having a professional print shop on your desktop, incorporating professional quality image printing capabilities, as well as optional speciality toner upgrade kits such as dye sublimation, fluorescent and metallic toners.

Use the IColor 540 for five different uses:

- White overprint™ for heat transfer printing
- White underprint™ for card/paper stock
- CMYK for regular office printing
- Optional dye-sublimation printing
- Optional fluorescent printing

ProRIP & SmartCUT Software

The IColor ProRIP Software gives you total control of your workflow, allowing you to resize, rotate, change and remove colours in your graphics efficiently and easily.

The IColor SmartCUT Software allows you to increase your designs from A4 to A3, enabling you to produce larger graphics with your IColor 540 Printer. This software creates an intelligent split in your design, masking the join between artwork with no visual separation.

Enhance your Garment Decoration Business

Expand your business opportunities and tap into a wide variety of market segments by producing personalized garments, accessories and more. Produce graphics with both colour and white for application to virtually any dark coloured textile or substrate. The printed image will result in soft, bright colours and the garment can be washed over and over without significant wear of the transfer.

The IColor 540 provides cost-effective fabric transfer production without the constant maintenance associated with direct-to-garment or silk screening systems. Get outstanding image quality results when combined with the correct transfer media to transfer images onto all fabric types whether light or dark!

What's Included?

- ✓ CMYK + W Toners
- ✓ ProRIP Software
- ✓ SmartCUT Software
- ✓ Underprint/Overprint Technology
- ✓ 2 Year return to base warranty
- ✓ Quick Setup Guide

Also Available:

- Dye Sublimation Toners
- Fluorescent Toners
- Metallic Toners (Stationery Only)

Unique Features

- Print A4, A4XL and A3 using the Included SmartCUT and ProRIP Software.
- Ability to print white as an underprint™ and an overprint™ in the same machine, in one pass, using the IColor ProRIP software.
- The white opacity of UNINET's unique blend of toner is double that of any other brand, giving you the brightest whites and solid background to bring out the vibrancy of your colours.
- The true black cartridge is included with the printer, allowing you to switch to CMYK mode to print items such as paper, card media and CMYK transfer papers.
- Lowest cost and most flexible machine in the market.
- Exceptional 1200 x 1200 dpi resolution.
- No maintenance associated with the IColor 540 as it is a toner based system.
- Easily swap back and forth between regular and speciality cartridges, eliminating the need to purchase separate machines to accomplish each function.
